- Must be punctual
- Must be able to work overtime

As an Operator, you would be directing the machine team. You would be the primary set-up person who would monitor the machines operating system. You would be required to ensure all product produced is to the customer's specifications. Following quality procedures and sign offs will be your responsibility. You would direct the assistant operators and monitor their progress. It is important that the assistants understand the operation of the machine to ensure the machine runs smoothly. At the same time you would be expected to monitor the quality of the final carton to ensure the machine has not adjusted throughout the run. This is a fast pace position and paying attention to detail is a must.

The above is only an overview of the duties, other duties may be expected.
